ABOUT US

Gilson is a family-owned global manufacturer of sample management and purification solutions for the life sciences industry. We help researchers advance the pace of discovery by creating easy-to-use lab devices that improve reproducibility and traceability. Since 1957, we've been developing innovative products, such as the first continuously adjustable-volume pipette, PIPETMAN®. By partnering closely with the scientific community, we have advanced our portfolio offerings, adding automated pipetting systems and chromatography instruments, plus intuitive software management capabilities. Backed by worldwide R&D, service, and support, Gilson strives to enable verifiable science and to make lab life easier for our customer

Our Vision

Enabling verifiable science and making lab life easier for researchers.
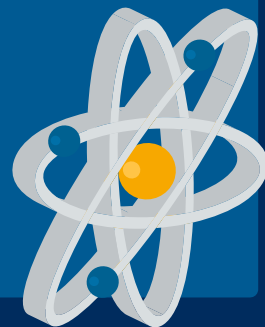

Our Mission

To partner with the scientific community and help researchers advance the pace of discovery by creating instruments and services that improve their results.

CORPORATE RESPONSIBILITY

Gilson has been around for 75 years and counting, and sustainability is in our genes. Our involvement in protecting the environment extends to our financial resources, operations, employees, suppliers, customers, and the communities we live and work in daily.

From carefully designing our products to be greener, to protecting our environment through small changes in our daily work, you can be sure that sustainability is at the core of what we do. We are proud to have been awarded the EcoVadis Silver Award for Excellence in Environmental Responsibility, Social Laws, Business Ethics, and Supply Chain Management. We also maintain a number of initiatives that help us to give back to the amazing scientists in the field and support access to science for all.

EXPERTISE FOR YOUR APPLICATIONS

For decades, we've been helping researchers advance the pace of discovery by creating easy-to-use, application-oriented lab tools that improve reproducibility and traceability. No matter your application, we have resources, products, and solutions to help make your lab life easier.

Molecular Biology

Molecular Biology is the study of how molecules interact with one another in living organisms to perform the functions of life. Mostly focusing on genes and proteins, molecular biologists use techniques like the polymerase chain reaction (PCR) to amplify DNA for various applications such as cloning, gene expression analysis (RT-PCR, RT-qPCR), Next Generation Sequencing (NGS), and more.

LEARN MORE

Natural Products

Natural products can be both chemically synthesized or isolated from natural sources such as plant and tissue extracts, fermentation broths, etc. Active agents from natural sources are typically found in very low levels and must be extracted and purified to higher concentrations to demonstrate their specific activity. We offer a range of extraction and purification resources and products to benefit your natural products workflows.

LEARN MORE

Proteomics

Proteomics is the study of proteins in living systems. They carry out a variety of functions such as generating an immune response to foreign bodies, catalysis of biochemical reactions, movement, structural support, and cell signaling to name a few. Our range of instruments help aid in the purification and characterization of proteins from simple low-pressure systems to mass-directed purification.

LEARN MORE

For more application-specific content, resources, and products, explore our applications center on gilson.com.

Environment & Food Safety

As we find new ways to grow food, clean our water supply, and identify new pathogens, it is increasingly important to make sure your application is accurate and optimized to ensure quality, nutritious food and a safe environment for us to live in. From analyzing pesticides on crops to identifying perfluorinated compounds (PFCs) in water, your food safety and environmental applications can benefit from our range of extraction and liquid handling solutions.

LEARN MORE

Forensic Toxicology

Forensic toxicology is part of the science of pharmacology, and is defined as the analysis of biological samples for the presence of drugs and metabolites or biomarkers. This also includes studying the adverse effects of drugs and chemicals on living organisms. Robust instrumentation, a flexible software interface that meets the needs of the scientist, reproducible methods, and traceability are all needed in regulated environments.

LEARN MORE

FEATURED APPLICATIONS CONTENT
VERITY® 271 LCMS System: Mass-based Peptide Purification

Preparative LC coupled with mass spectrometry (MS) is a well-established method for purifying target compounds. In this tech note, we demonstrate the use of a VERITY 271 LCMS system to perform mass-based purification of target peptides from a mixture. The system is controlled using TRILUTION® LC Software, which provides real-time and post-run MS and UV data.

LEARN MORE

PIPETMAX®: Automated Liquid Handling for Reliable qPCR Experiments

The quantitative polymerase chain reaction (qPCR) has transformed the world of molecular biology methodology by enabling fast, high-throughput detection and quantification of DNA and RNA in real time. PIPETMAX is specifically designed to maximize reproducibility and accuracy in qPCR workflows. Here, we explore three ways that PIPETMAX can help you run more effective and efficient experiments.

SERVICE EXPERTS READY TO HELP

WE'RE HERE TO HELP

We are committed to the highest caliber of quality and complete customer satisfaction with our suite of products and services. This commitment doesn't end with your purchase—it only just begins. We provide custom solutions to help you meet a wide range of laboratory requirements including: service, preventative maintenance, calibration, and general product support. Gilson has dedicated service, support, and training teams worldwide to help you maintain maximum performance of your instruments, make your lab life easier, and ensure reliability of your data.

MANUAL LIQUID HANDLING

Have our Expert Technicians Restore your Pipettes

Gilson is the expert on pipettes with over 50 years of experience in the industry. Regular maintenance of your pipettes ensures they operate within specification and deliver reproducible data with the accuracy you need. Regular service also helps minimize downtime in your lab, reduces the likelihood of unplanned, costly repairs, and increases the lifespan of your pipettes. Gilson service technicians are factory trained and use manufacturer parts along with proprietary software, such as Gilson Volumetrics™. Gilson Volumetrics utilizes automatic data transfer from our analytical balances and environmental probes to generate your service documentation with the utmost attention to detail and accuracy of data. Gilson is an ISO 9001-certified company and ISO 17025-accredited service is available throughout the organization.

AUTOMATED LIQUID HANDLING

Avoid Unexpected System Downtime and Assure Accuracy

Keep your instruments running like new by signing up for preventative maintenance services. With regularly scheduled preventative maintenance, you'll extend the life of your instruments and save time and money by avoiding unexpected interruptions to your work. Additionally, you can have confidence in the accuracy and reliability of your results because we'll ensure your instruments are operating within original specifications.
SERVICES & SUPPORT

QUALITY PIPETTE SERVICE MADE EASY

Never question the integrity of your samples. Our flexible, tiered service level offerings, along with the option for ISO 17025 accredited service, are tailored to fit your lab's needs. By regularly servicing your pipettes, you can minimize unplanned, costly repairs while increasing the lifespan of your pipettes.
Quality Pipette Service Made Easy

Never question the integrity of your samples. Our flexible, tiered service level offerings, along with the option for ISO 17025 accredited service, are tailored to fit your lab's needs. By regularly servicing your pipettes, you can minimize unplanned, costly repairs while increasing the lifespan of your pipettes.

Ensure Accuracy and Reliability for your Instruments & Systems

Keep your instruments running like new by signing up for preventative maintenance services with our team of expert technicians. With regularly scheduled preventative maintenance, you'll extend the life of your systems and save time and money by avoiding unexpected interruptions to your work. Additionally, you can have confidence in the accuracy and reliability of your results because we'll ensure your instruments are operating within original specifications.

ISO 17025 Accredited Service Available

Gilson's ISO 17025 accredited calibration labs can offer additional reporting on your calibration certificates for maximum traceability, perfect for GLP/GMP compliant labs. We can provide ISO 17025 compliant service both in our dedicated Service Centers as well as on-site in your lab. You can be sure your pipettes maintain their original accuracy, precision, and performance capabilities.

OEM CAPABILITIES

ORIGINAL EQUIPMENT MANUFACTURER PRODUCTS

Bring your ideas to market faster and with lower development and manufacturing costs by becoming an Original Equipment Manufacturer (OEM) partner with Gilson. We provide reliable and precise liquid handling components or complete systems that can be easily integrated into your core instrument, with support from a worldwide network you can depend on. Our philosophy is simple: build and support relationships that are as strong and reliable as our products.

Get to Market Faster with Our OEM Solutions

As a partner with Gilson, you will work closely with our research and development scientists and engineers and draw on their technical expertise to solve problems and develop your product. From proposal development to finished product and beyond, our team of experts is here to help you every step of the way.

Customization Capabilities

Draw on our proven experience and strong engineering and manufacturing capabilities to help develop your custom product. We offer expertise and assistance throughout the entire process—from development and integration of the product, to support and on-going training.

KEY BENEFITS

- Custom Products
- Software Control Options
- Fully Tested and Validated Product
- Custom Branding
- Outstanding Service and Support

- Modular Design for Easy Integration
- ISO 9001 Certified
- Regulatory Compliance
- Custom Packaging and Literature
Highly Customizable Automated Liquid Handling Systems to Fit your Exact Needs

Gilson can provide standard liquid handling instruments to highly customized instrumentation across a wide variety of applications. Customization can be applied to simple, small components or to complete liquid handlers tailored to your unique specifications. Gilson has the liquid handling solutions to meet your requirements. Whether you want to aspirate, collect, dispense, inject, mix, or pump liquids, we can provide reliable, quality OEM products to fit your application.

Learn more

Increase your Brand Awareness with Value Added Manual Liquid Handling Products

Gilson offers the ability to help increase your brand awareness with value added products. As an industry leader in manual pipetting, we can provide customized tools that deliver the precise control needed for accurate sample and reagent volume transfers. We offer a variety of pipettes in a range of ergonomic designs and volume sizes, as well as pipette controllers, tips, and accessories that enhance the pipetting experience and provide reproducible results. Our OEM/PL pipette is a genuine Gilson product providing the "Best Value" combination of quality, features, service, and price. Additionally, our Account Managers can help you align your company vision with product offerings that can be customized to increase your recognition in the market.

Learn more

Automate Your Kits Through a Value Added Partnership (VAP)

The Value Added Partnership (VAP) is a shared cooperation in which Gilson maintains ownership of installation and support at your customers' sites. Our VAP option is ideal for reagent manufacturers who wish to offer a complete, automated assay method to their customers without investing in sales or hardware support. In a VAP, you will work with our technical team to automate your method and validate your protocol on a specified Gilson liquid handling system. This shared cooperation allows you to benefit from our technical expertise and global coverage while increasing your kit and consumable revenue.

LIQUID HANDLING

TRUSTED RESULTS BEGIN WITH TRUSTED LIQUID HANDLING TOOLS

Gilson liquid handling tools deliver the precise control you need for sample and reagent volume transfers, ensuring reproducible results while making life in the lab easier. Beginning with the legendary PIPETMAN® technology, our liquid handling tools have evolved with your needs. Ergonomically designed with scientists like you in mind, we offer durable solutions from manual, single channel units to completely automated liquid handling systems.

PIPETTE FAMILIES

What are Manual Air-Displacement Pipettes?

Air-displacement pipettes are very accurate for standard pipetting applications. The piston, integrated in the lower part of the pipette, moves the liquid under the action of an air cushion (called dead volume) between the pipette and the liquid sample. It is recommended to use an air-displacement pipette with aqueous and non-viscous samples. Temperature and atmospheric pressure, as well as the specific weight and viscosity of the solution, can affect the performance of air-displacement pipettes.

Air cushion

Disposable tip
What are Electronic Air-Displacement Pipettes?

Electronic pipettes work like manual air-displacement pipettes under the action of an air cushion. The manual movement of the piston is carried out by an electronic motor, requiring virtually zero pipetting forces. They decrease the risk of RSI-type injuries caused by repetitive pipetting and improve comfort as well as reproducibility at the bench.

What are Positive-Displacement Pipettes?

Positive-displacement technology is ideal when working with infectious, viscous, foaming, hot, cold, or volatile liquids because the disposable piston within the capillary piston (CP) tip is in direct contact with the sample. The CP technology thus removes any air cushion inside the pipette and ensures the volume accuracy is not affected by the fluid's properties. This also helps prevent contamination and protects both the user and the pipette.

trackman®
CONNECTED

MAKE YOUR LAB AS SMART AS YOUR SCIENCE

TRACKMAN® Connected is a tablet with exclusive applications and accessories that make pipetting on different labware more reliable, improving the efficiency and traceability of your experiment.

Boost Your Experiment Reliability

When paired with PIPETMAN® M Connected, the installed PipettePilot® app guides you through your pipetting protocol. The app displays where, when, and how much to pipette with real-time interactions to prevent errors.

Get Immediate Reproducibility

With the digitally documented protocol, your team can be confident that a protocol is being executed the same each time.

Improve the Traceability of your Experiment

Integrate connected tools into your protocols in a safe and convenient way.

TRACKMAN Connected offers complete traceability of your experiments by recording pipetting actions and environmental conditions.

Access Pipette Analytics and Calibration History

PipetteScope® informs you exactly when your pipette needs to be calibrated. Through the app, you can easily request a calibration appointment and also view service history reports in one central location. PipetteScope gives you instant access to the pipette usage analytics as well as access to the user guide.

⬇ **Download App**

Pair it with PIPETMAN® M Connected

Explore new possibilities in protocol execution assistance, traceability, and data acquisition through its Bluetooth® connection to Gilson applications.

For more information about PIPETMAN M Connected, refer to page 14.

Inside Your Kit

Tablet with PipettePilot® and PipetteScope® Apps

Interact with all your apps at the bench with the tablet included in your kit. The tablet comes preloaded with PipettePilot to create and track pipetting tasks. The app displays where and when to pipette with real time interactions to prevent pipetting errors and provides you with a report for complete traceability of your experiment.

Our other application, PipetteScope, helps you keep tabs on your pipette last calibration, user's guide, and other useful pipetting metrics.

Environment Sensor

Monitor temperature, pressure, and humidity during your experiment with your environment sensor.

Benchtop Pipetting Accessories

Get all the accessories to integrate your tablet at the bench in a safe way: microplate holder, tempered glass screen protector, microplate adapter, and strip adapters.

Full range of accessories can be found on page 28.

pipetman®

PIPETTE SMARTER. REPORT FASTER. CONFIDENTLY.

PIPETMAN® M Connected is an electronic, Bluetooth®-enabled pipette that offers accuracy and precision in both standard and repetitive pipetting modes. Requiring virtually no pipetting forces to aspirate and dispense samples, PIPETMAN M Connected helps reduce pipetting fatigue and increase pipetting efficiency. PIPETMAN M Connected is available in 20 models, covering a volume range from 0.5 µL to 10 mL for single channel models, and 0.5 µL to 1200 µL for multichannel models.

Make Manual Processes Verifiable

With PIPETMAN M Connected, explore new possibilities in protocol execution assistance and data acquisition through the Bluetooth® connection to Gilson applications.
The pipette interacts in real time with your TRACKMAN® Connected system for increased accuracy and efficiency in both standard and repetitive modes.

GILSON SOFTWARE APPLICATIONS

PipettePilot®

The PipettePilot app comes preloaded on the TRACKMAN Connected tablet. The app displays where and when to pipette in real time to prevent pipetting errors. The app also provides you with a report for complete traceability of your experiment.

PipetteScope®

With PipetteScope, know exactly when your pipette needs to be calibrated, request a calibration appointment, and view service history reports, all in one location. Additionally, with the app, you'll gain visibility into your pipette's usage analytics and get quick access to user's guides.

PIPETMAN M Connected Software

Executing custom protocols has never been easier. PIPETMAN M Connected Software allows you to create, save, and transfer up to ten custom protocols into PIPETMAN M Connected.

Download PipetteScope and PIPETMAN M Connected Software for free on **www.gilson.com**.

M

GUARANTEED PERFORMANCE WITH OUTSTANDING ACCURACY

The PIPETMAN® M electronic pipette combines the simplicity of a mechanical pipette with the consistency of an electronic liquid handling tool. The PIPETMAN M range has been designed for guaranteed accuracy and precision in both standard and repetitive modes for reliable sample preparation.

On-Target Performance

Trust your results with guaranteed performancein both standard and repetitive pipetting modes.

Pipetting Comfort

Lightweight and perfectly balanced with low ejection and volume setting forces, for hours of pipetting comfort.

Ease-of-Use

With a streamlined user interface and four pipetting modes, control of your sample prep is at your fingertips. Switch to custom mode to execute your own protocol transferred from the PIPETMAN M Software.

MyPipetman®

A UNIQUE COMBINATION OF FUNCTIONAL CHOICES AND PIPETTE PERSONALIZATION

MyPIPETMAN® Enterprise is a series of fully autoclavable pipettes that include technical and personalization options. Unique, reliable, and ergonomic, they are the right solution for enterprises or industries that are looking for better efficiency and performance in daily activities through various applications and workflows.

Design Your Very Own Gilson Pipette Series

MyPIPETMAN Enterprise offers several customization options to ensure efficiency and answer your pipetting needs within various workflows.

Technical Features

Choose your preferred technical features to optimize the use of your pipette and increase overall productivity in the lab:

- With or without volume locking system (Trilock™ or simple ratchet)
- Reduced or standard pipetting and ejection forces
- Metal or plastic tip ejector (from P2 to P1000 single channel models)

Colors and Extra Personalization Options

Color choices and printing options on your pipette allow for better organization and identification within your applications:

- Handle and lower parts color choices
- One side of the pipette can be printed

Trilock™
3-position system for volume setting and locking

Simple Ratchet
Simple ratchet for volume setting

Free Volume Setting	Light Ratchet Volume Setting	Volume Locked
MyPIPETMAN Enterprise pipettes are made-to-order pipettes based on your design and technical choices. They are produced in a series of a minimum of 150 units (mix of differents volumes). All pipettes inside a series will have the same technical features, same design, and same information printed on the handle.

MyPipetman®

SELECT

SELECT OPTIONS FOR IMPROVED PIPETTING

Ergonomic, safe, and reliable, MyPIPETMAN® Select offers volume setting choice and optionnal handle personalization for an optimal use in various protocols.

Set and Secure the Volume your Preferred Way

The unique and patented Trilock™ volume-locking system enables you to choose different positions when setting the volume:

- Free volume setting position for quick and effortless volume adjustment
- Light ratchet volume setting for precise volume adjustment
- Volume locked position for secure pipetting

With this new Trilock™ system, the volume is adjusted simply by turning the push button of the pipette.

Free Volume Setting | Light Ratchet Volume Setting | Volume Locked

Ergonomic Design

Lightweight and well-balanced, MyPIPETMAN Select has an elegant design with a textured effect for a better grip.

With no compromise on quality and performance, the built-in ejection system provides reduced tip ejection forces. This patented ejection system reinforces the pipette's ergonomics for convenient use throughout the day.

Extra Personalization with Accessories

Other accessories like colored windows, tip holders, and tip ejectors are available in different colors and material for additonal customization and ease of use. Standard accessories, such as pipette stands and holders, are also available.

Personalize your Pipette for Optimal Use

MyPIPETMAN Select can have their handles printed on demand. Identify your pipette to avoid any risk of contamination by dedicating it to a specific liquid or workflow step and improve your lab Lean Management process.

pipetman® L

INCREASED COMFORT AND PRODUCTIVITY

Designed for performance and comfort, PIPETMAN® L offers a comprehensive range of models, adapted to all your needs.

Convenient Use

Lightweight and balanced, PIPETMAN L combines an ergonomic design with minimized pipetting forces, giving you the ability to pipette longer without fatigue.

Right-handed or left-handed? No problem. Adjust the location of the tip ejector to the most comfortable position for you.

Extended Range & Tip Compatibility

Available as a fixed or variable volume, the PIPETMAN L line covers a full volume range from 0.2 µL to 10 mL for single channel models, and from 0.5 µL to 1200 µL for multichannel models. Precise, accurate, and reliable, they can be intensively used with confidence in many applications.

Four PIPETMAN L multichannel models (model name ending with VR), covering a volume range from 20 µL to 300 µL, are equipped with V-rings at the bottom of the tip holders for a proper fit with most tip brands *(using the Rocky Rack technique is recommended)*.

Secure Pipetting

Reduce pipetting errors and avoid accidental volume changes during pipetting cycles with a true volume-locking mechanism for improved accuracy and precision. PIPETMAN L variable volume models are all fully autoclavable without disassembly for maximum convenience and protection from cross-contamination.

Watch PIPETMAN® L in action

Watch Video

*To determine if your PIPETMAN L is autoclavable, check to see if the serial number begins with NK or newer versions. If you're unsure, please contact your local Gilson representative.

Store Your Pipettes On Our CARROUSSEL™ Pipette Stand

The CARROUSSEL™ Pipette Stand holds up to seven Gilson single or multichannel pipettes, protecting them from contamination.

Full range of accessories can be found on page 28.

pipetman®

L

COMFORTABLE PIPETTING WITH SECURED FIXED VOLUME

The PIPETMAN® L Fixed pipettes offer the same comfortable, lightweight design as the variable volume models with a fixed volume that reduces the risk of any volume error during pipetting. This makes them an ideal choice for clinical diagnostics, quality control, and any routine testing applications even for non-trained lab technicians. Fifteen models of the air-displacement-based PIPETMAN L Fixed pipettes are available, covering a volume range of 1 µL to 5 mL.

The CARROUSSEL™ Pipette Stand holds up to seven Gilson single or multichannel pipettes, protecting them from contamination.

Full range of accessories can be found on <u>page 28</u>.

pipetman®

RECOGNIZED RELIABILITY AND PROVEN DURABILITY COMBINED WITH EASY PIPETTING AND HANDLING

Recognized as the pipetting standard for its reliability and proven durability, PIPETMAN® combines legendary accuracy, precision, and durability with easy pipetting and handling.

Legendary Performance

Accurate and precise, PIPETMAN® air-displacement pipettes are recognized as one of the world standard.

They come in a large range of volumes, including single and multichannel models, allowing you to handle various sample types with confidence.

Easy Pipetting

PIPETMAN feels like the PIPETMAN® Classic but with lower forces and enhanced standard pipetting habits.

Built-to-Last and Convenient

Made of resistant materials, PIPETMAN offers premium durability. Built-to-last, it is the economical solution for years of pipet ting.

Simple to Maintain

Routine cleaning and maintenance are all that is required to keep PIPETMAN in top condition for years. The PIPETMAN design allows for easy access to user-serviceable parts, along with a fully autoclavable tip holder and ejector.

Store Your Pipettes On Our SINGLE™ Holder Pipette Stand

Convenient option for holding a single or multichannel PIPETMAN® pipette, protecting the pipette from contamination without taking up any precious bench space.

Full range of accessories can be found on page 28.

DIAMOND TIPS

HIGHEST QUALITY TIPS FOR SUPERIOR RESULTS

Not all pipette tips are created equal. Trust Gilson's PIPETMAN® DIAMOND Tips to deliver the accuracy and precision your experiments demand. All tips are manufactured using the highest quality materials and state-of-the-art manufacturing techniques so you can be assured of consistent lot-to-lot performance.

Guarantee Your PIPETMAN® Results

PIPETMAN DIAMOND Tips are designed to fit your PIPETMAN perfectly. Using PIPETMAN DIAMOND Tips in conjunction with your Gilson pipette guarantees maximum accuracy and precision.

Affordable and Versatile For Every Application

Your needs, budget, and tip consumption vary according to your specific research activity. With our extensive range of packaging, PIPETMAN DIAMOND Tips are an affordable option for every lab and every application.

Contamination-Free

Our tips are made of the highest-grade material within a fully traceable clean room environment, ensuring they offer low retention and are free of contaminants that can alter your experiments. From mold to bench, they are guaranteed, certified, and traceable to meet the most stringent demands in many applications.

Choose the Right Tip for Your Needs

From purity level to volume range, this handy interactive tip selection guide will help you find the perfect tip for your application. Download now to get a clear view of our entire pipette tips offering.

TOWERPACK

A quick, easy and affordable rack refill system

Uses 60% less space on your bench and 70% less plastic than regular rack box

One-hand system operation

SHOP NOW

Certified Contaminant Free
These tips are certified free of human DNA, RNases, DNases, PCR inhibitors, and pyrogens.

Gilson Universal Fit Tips
Designed to fit perfectly and provide the best results with Gilson pipettes, the universal design of PIPETMAN EXPERT Tips allows them to be used with most leading pipette brands. Additionally, because of the universal fit, PIPETMAN EXPERT Tips allow you to stock up on one brand of tips with practical packaging options, saving you time, money, and bench space.

### Space Saving Environment Friendly Packaging
The Towerpack and MegaPack configurations allow labs to store more tips using less space on the bench. Less packaging material is used and the plastic is recyclable.

Gel Loading Tip Solutions
Receive maximum accuracy and the best possible results when using PIPETMAN EXPERT long, round tips and the specially patented flat gel loading tips.

Choose the Right Tip for Your Needs
From purity level to volume range, this handy interactive tip selection guide will help you find the perfect tip for your application. Download now to get a clear view of our entire pipette tips offering.

AmpliPur®

EXCELLENT FIT FILTER TIPS FOR MOLECULAR BIOLOGY APPLICATIONS

AmpliPur® Expert Tips are ISO 8655-compliant and provide a significant value for the money spent. They are manufactured according to certified quality standards, ensuring each tip is free of DNase and RNase. These filter tips protect precious samples from cross-contamination and are designed to fit various pipette brands.

Excellent Fit

AmpliPur Expert Tips are designed to fit various pipette brands for maximum convenience on the bench. Equipped with a filter, they also help prevent cross-contamination.

Ideal for Molecular Biology Applications

These tips significantly contribute to molecular testing performance by ensuring sample integrity during the pipetting process.

ISO 8655 Compliant

Manufactured according to the certified Gilson quality standard, AmpliPur Expert Tips comply with ISO 8655 requirements and are certified free of RNase and DNase, preserving your sample integrity.

Amplipur® Expert Tips

Volume Range	Nominal Volume of Compatible Pipettes*	Qty/Commercial Unit (CU)	Part Number (Commercial Units)
0.5-10 μL	2 μL / 10 μL	960 (10 racks of 96 tips)	F174101
1-20 μL	20 μL	960 (10 racks of 96 tips)	F174201
10-200 μL	100 μL** / 200 μL / 300 μL	960 (10 racks of 96 tips)	F174301
100-1000 μL	1000 μL	960 (10 racks of 96 tips)	F174401
100-1200 μL	1000 μL / 1200 μL	960 (10 racks of 96 tips)	F174501

*Within ISO 8655 specifications.
**Compatible with many of 100 μL pipettes, except Gilson P100 single channel.

microman®

E

ERGONOMIC PIPETTING FOR NON-AQUEOUS LIQUIDS

MICROMAN® E positive-displacement pipettes, along with capillary pistons, offer the highest precision when ergonomically pipetting non-aqueous samples, such as viscous or volatile liquids. Capillary pistons eliminate the air cushion between the sample and disposable piston, ensuring the accuracy of the pipette is not affected by the physical properties of the sample.

Contamination-Free Pipetting

Minimize the potential for pipette, sample, and human contamination with MICROMAN E. Dispose of the capillary piston (CP) tip safely and without hand contact by simply pushing the push button until the last stop.

Reliable Results Even with Non-Aqueous Liquids

Whether a viscous, volatile, hot, or cold sample, MICROMAN E can handle the job with accuracy and precision. Have complete confidence in your results with the volume-control switch that reduces the risk of accidental volume change.

Triple Protection

Positive-displacement technology is the ideal solution to prevent from aerosols contamination or sample carry-over, protecting the pipette, the user, and the sample.

Capillary Pistons

100% Protection Against Contamination

The disposable piston is located inside the capillary tip so users can be assured that no harmful samples will contaminate the pipette.

● No risk of chemical contamination
● Slender profile— fits most tubes

distriman®

FASTER MULTIPLE DISPENSING

DISTRIMAN® is a positive-displacement, continuously adjustable, repetitive pipette with direct read out designed to simplify multiple dispensing when used with DISTRITIPS syringes. With DISTRIMAN, you can dispense the exact volume required for any protocol, even fractional volumes. It is ideal for repetitive dispensing in clinical, hospital, biological, chemical, food and beverage, pharmaceutical, cosmetics, and forensics labs.

Simplifies Multiple Dispensing

Dispense exact volumes without tedious calculations and ensure optimal pipetting results even with volatile or viscous liquids.

An Economical Solution

DISTRIMAN covers a large volume range with only three DISTRITIPS syringes, making it very economical. DISTRITIPS are available in standard or pre-sterilized form (boxes of 50).

DISTRIMAN is the only continuously adjustable mechanical repetitive pipette with direct volume readout available on the market.

DISTRITIPS®			
DISTRITIPS (Pack of 50)	Aliquot Range	Part Number	Volume Range (µL)
125 µL Micro Micro Pre-Sterile*	1–12.5 µL	F164100 F164130	2-10
1250 µL Mini Mini Pre-Sterile*	10–125 µL	F164110 F164140	20-100
12.5 mL Maxi Maxi Pre-Sterile*	0.1–1.25 mL	F164120 F164150	200-1000

DISTRIMAN*	
Description	Part Number
DISTRIMAN (1 µL to 1.25 mL)	F164001

CV means Coefficient of Variation (%)
*Pre-sterile refers to sterility assurance level between SAL10⁻² and SAL10⁻⁵ (individually wrapped).

repet-tips

REPET-TIPS FOR MOTORIZED REPETITIVE DISPENSING SOLUTION

Specifically made for the REPETMAN® positive-displacement electronic pipette, the REPET-TIPS® cover volumes from 0.1 to 50 mL, in either sterile or non-sterile formats as well as adaptors for 25 and 50 mL tips. The tip-size encoding system of the REPETMAN* automatically identifies the REPET-TIP when placed on the pipette, and displays the appropriate volume on the LCD screen.

For the 25 and 50 mL sizes, a special adaptor is used that is supplied with the tips.

The adaptors are also available separately, non-sterile (Part No. F164591) and sterile (Part. No. F164592).

REPET-TIPS are not available in the United States.

*Repetman is no longer available for selling.

macroman®

THE EFFICIENT SOLUTION FOR PIPETTING UP TO 100 MILLILITERS AT ONCE

MACROMAN is a reliable pipette controller which can be used with glass and plastic serological pipettes from 1 to 100 mL, with a total volume range from 0.1 to 100 mL.

Optimal Speed Control

The aspirating and dispensing speed can be set using pressure sensitive triggers while pipetting. A maximum speed can be set by using the thumbwheel to prevent from over aspiration. The speed is adjustable up to 25 mL in less than three seconds.

The screen continuously displays battery status as well as the aspiration and dispensing speed setting.

Comfortable Use

Prevent hand fatigue with MACROMAN's ergonomic handle featuring wide triggers for maximum comfort and stress-free pipetting.

The Lithium-Ion battery enables a longer, vibration-free use with more than 10h of autonomy.

Increase precision by choosing your flow rate mode from slow drops to rapid dispensing.

All stands are included with MACROMAN for stable and easy storage on the bench.

MACROMAN®

The side stand allows the MACROMAN to be set down quickly between pipetting operations, preventing from contamination of the serological pipette or benchtop.

serological
PIPETTES

OPTIMIZED PIPETTING CONTROL

Ideal for scientists who need to easily and quickly transfer liquid aliquots from one container to another with precision, the Gilson disposable plastic serological pipettes are perfect for use with MACROMAN® to help you in your daily cell-culture, molecular biology, and microbiology applications.

Reliable

Gilson serological pipettes are made with USP Class VI polystyrene and are free of contaminants that can alter your experiment. They are gamma-sterilized, non-pyrogenic, and certified free of detectable RNase/DNase. The polyester fiber plug provides a high level of protection against over-pipetting and contamination by liquids and aerosols.

Easy Volume Control

Our serological pipettes offer precise volume control and have color-coded rings for easy size identification, as well as dark ascending and descending graduations so you can easily read the aspirated and dispensed volumes. They also have negative graduations for extra capacity.

Flexible

Available in models ranging from 1 to 50 mL, these serological pipettes are recommended for use with MACROMAN but can also be used with any pipette controller. They enable precise and convenient dispensing of different kinds of liquids for a variety of tasks.

platemaster®

FAST MICROPLATE PIPETTING

PLATEMASTER® is an easy-to-use solution for high throughput pipetting of 96- and 384-well microplates.

Save Time and Increase Your Productivity

The PLATEMASTER's 96-channel design greatly reduces the number of pipetting steps necessary to fill a microplate when compared to using regular manual multichannel pipettes. When using PLATEMASTER, the time it takes to fill 96-well plates is significantlyreduced to approximately 10-20 seconds or less, and 384-wells can typically be filled in less than a minute using only four pipetting steps.

Simplifies Sample Prep

Using PLATEMASTER for higher throughput applications reduces the risk of human error. In a single motion, accuracy and precision levels can equal that of an 8- or 12-channel pipette, while avoiding the risk of skipping or repeating wells. Additionally, all enzymatic reactions and cell-based applications across all wells can be started and stopped at the same time. From 0.5 µL to 220 µL pipetting volumes, expect improved well-to-well and plate-to-plate reproducibility.

Convenient for any Microplate Application

PLATEMASTER is as intuitive as a PIPETMAN® and does not require programming, long training, or power for use. Through a variety of accessories, such as adapters for loading 384-well microplates, reagent reservoirs, or sample heater blocks, PLATEMASTER can be fully adapted to a variety of application needs. Its compact and portable design easily integrates into the lab, allowing it to fit on most benchtops, under hoods, or in cold rooms.

safe aspiration

QUICK AND EASY ASPIRATION OF LIQUID WASTE

The Safe Aspiration Station is a stand–alone motorized vacuum unit, ideal for cell culture, ELISA tests, and liquid waste disposal. The closed unit is designed to prevent contamination hazards, and all parts in contact with liquids are fully autoclavable. Associated with the Safe Aspiration Kit, which includes a set of different adapters, the Safe Aspiration Station is easy to use on a bench or in laminar flow cabinets.

Safe and Contamination–Free

The station is equipped with a 4–liter Polypropylene (PP) bottle, a level detection system to prevent liquid overflow, and an in-line hydrophobic filter that traps aerosols for safe disposal of contaminated or hazardous liquids.

Adaptable and Convenient

The station also ensures an adjustable aspiration level indicated by a board of LEDs.

The choice of the adapter and the easy setting of the vacuum level enable quick and accurate aspiration of liquids from a variety of vessels.

The ergonomic hand operator can be stored on the bottle handle. The Safe Aspiration Kit also contains a stand with storing gaps for the adapters and the hand operator to help your workspace remain clean and organized.

dispensman®

DISPENSE LIQUIDS SIMPLY AND ACCURATELY

DISPENSMAN® is a bottle-top dispenser for convenient, safe, and precise delivery of common laboratory solutions and solvents. Its innovative, three-position nozzle controls the dispensing of liquids, the removal of air in the system to avoid liquid loss, and includes an anti-drip safety feature that returns liquid to the bottle.

Precise

Dispense just the liquid needed every time with a quick, easy, and precise volume setting.

No Loss of Liquid

Prime your operation by purging the air in RECYCLE position keeping the liquid inside the bottle and avoiding any loss of liquid.

Safe

Keep your bench and other devices safe with the anti-drip system and the return of liquid into the bottle after use.

Flexible

- Numerous bottle adaptors
- Adaptable to every type of liquid with an easy calibration by the user
- Fully autoclavable at 121°C
- Convenient 3-position nozzle

QUICK AND SAFE SAMPLE CENTRIFUGATION

The CENTRY™ 103 Minicentrifuge is an easy-to-use and portable benchtop device ideal for the quick separation of particles from a supernatant. It also enables a quick spin down of a drop of liquid from the walls of microtubes.

Reliable and Safe

The CENTRY 103 Minicentrifuge integrates several safety features: it automatically stops after six minutes of continuous spinning, opening the lid anytime engages the brake, a pinch-type connector tightly secures the rotor, and a red light indicates when the power is switched on.

User-Friendly

Thanks to its ergonomic design, small footprint, and optional battery control, the CENTRY 103 Minicentrifuge can be used anywhere. The quick and easy starting and ending operations are controlled by pressing down on the lid.

The CENTRY 103 Minicentrifuge promptly reaches a fixed speed of 6,000 rpm, without adjustment. This minicentrifuge comes withcomes with two high-quality, easy-to-change rotors that can be used with microtubes or tube strips. The round rotor has a capacity of eight 1.5 mL or 2 mL microtubes, and the rectangular-shaped rotor has a capacity of two lines of eight connected 0.2 mL tube strips.

minipuls® 3

The compact MINIPULS® 3 Peristaltic Pump is a high-performance, low-pulse, peristaltic pump with interchangeable pump heads for delivering a variety of liquids—from biological to chemical. Six different channel and flow rate configurations are available.

Low-Pulse Liquid Transfer

Utilizing positive-displacement pump technology, liquid flows nearly pulse-free as a result of ten stainless steel rollers. MINIPULS 3 produces smooth flows with excellent accuracy and precision, even at high flow rates.

Flow Rates to Meet Your Needs

With a choice of six quickly interchangeable pump heads, you'll have a wide range of flow rates to use for your applications.

- Four standard models (1, 2, 4, or 8 channels):
  0.3 µL/min to 30 mL/min
- Two high flow models (2 or 4 channels):
  1 mL/min to 220 mL/min

Easy to Operate

MINIPULS 3 is easy to install, simple to operate, and easy to maintain. With a simple keypad control and easy-to-read LCD screen, start/stop, flow direction, increase/decrease flow rate, and prime functions are easily accessible. Remote start/stop is also possible.

Select the Right Tubing

The most suitable material according to your sample's chemical compatibility.

- Contains a large variety of internal diameters to reach desired flow rates.
- Features appropriate connectors and extension tubing.

FRACTION COLLECTORS

IDEAL SOLUTIONS FOR SMALL TO LARGE CAPACITY COLLECTION

Gilson offers advanced solutions for fraction collection from small-footprint to large capacity models. The collectors accommodate a wide variety of collection vessels, including microplates, vials, and tubes. The built-in, easy-to-use keypad makes setup and operation simple. The fraction collectors can be used standalone or controlled by TRILUTION® LC software. The compact size fits most fume hoods to protect you from hazardous materials.

Powerful Fraction Collection Capabilities

Multiple Fraction Collection possibilities:

Collection Mode	Without Diverter Valve	With Diverter Valve
Time	X	X
Drop	X	X
Peak		X
Time Windows		X

- The 3-way diverter valve allows to divert column void volumes, peaks of no interest, and equilibration volumes to a waste vessel.
- Easy integration into any system due to multiple Input/Output contacts connection, making them the preferred choice for a range of separation applications such as FPLC, FLASH chromatography, or HPLC.
- Optional multicolumn adapters are available for parallel collection from multiple channels.

FC 203B Fraction Collector

The FC 203B Fraction Collector is commonly configured with a MINIPULS 3 for low pressure chromatography or any fractionation system.
- Holds one rack to perform
  o Up to 128 fractions (12x75mm tubes)
  o Up to 105 fractions (13x100mm tubes)
  o One shallow- or deep-well microplate
- Available with and without diverter valve
- Optional multicolumn adapter to collect from up to 8 separate channels in parallel

FC 203B Fraction Collector	
Description	**Part Number**
FC 203B, 110/220 V	171011
FC203B with 3-way valve	171011DV

FC 204 Fraction Collector

The FC 204 Fraction Collector is ideal for collecting fractions from a liquid chromatography system from analytical to preparative flow rates. Associated with a peristaltic pump, it can offer a quick installed and low-cost tubing filling system with a small footprint for use in biosafety cabinets with an easy-to-sterilize flow path for minimized contamination.
  o Holds four racks to collect
  o Up to 240 fractions (13x100mm tubes)
  o Up to 176 fractions (18x180mm tubes)
  o Up to eight shallow or deep-well microplates
- Available with a 3-way diverter valve for flow up to 20 mL/min or for flow up to 200 mL/min
- Optional multicolumn adapter allows for collection from up to 18 separate channels in parallel

FC 204 Fraction Collector

LIQUID HANDLERS

Gilson liquid handling tools deliver the precise control you need for sample and reagent volume transfers, ensuring reproducible results while making life in the lab easier. Beginning with the legendary PIPETMAN® technology, our liquid handling tools have evolved with your needs. We offer completely automated liquid handling systems.

SELECTION GUIDE

GX-241 Liquid Handler

The GX-241 Liquid Handler offers a two-rack platform for large or small volume injection and automatic fraction collection using tubes, vials, or microplates. Its small footprint makes it an ideal choice for labs where bench space is limited.

Learn more

GX-271 Liquid Handler

The GX-271 Liquid Handler offers a small footprint, medium capacity liquid handler and autosampler offers small-to-large volume injection, fraction collection, and liquid handling capabilities.

Its optional dynamic syringeless pumping system is capable of delivering microliters to hundreds of milliliters, with no change in hardware.

Learn more

GX-274 Liquid Handler

The GX-274 Liquid Handler increases the throughput and efficiency of liquid transfers, serial dilutions, and other common tasks by processing up to four samples in parallel.

Learn more

GX-281 Liquid Handler

This GX-281 Liquid Handler provides a versatile, large capacity platform that can be configured for injection, fraction collection, and re-injection as part of a semi-preparative or preparative HPLC purification system. With optional accessories, it can also be used as a flexible liquid handler for performing a wide variety of automated, unattended liquid handling applications.

Learn more

gx-271

LIQUID HANDLER

This small footprint, medium capacity liquid handler and autosampler offers small-to-large volume injection, fraction collection, and liquid handling capabilities. Its optional dynamic syringeless pumping system is capable of delivering microliters to hundreds of milliliters, with no change in hardware.

Innovative Injection Modules

This mid-throughput liquid handler can be configured with a GX Direct Injection Module for injection onto an HPLC or LC/MS system. An innovative injection port design that attaches directly to the injection valve reduces void volumes and minimizes carryover associated with calibrated connection tubing, allowing injection volumes from 2 µL up to 25 mL.

The continuous flow path design on all injection valves allows the system flow to continue even as the injection valve switches from load to inject, ensuring consistent pressure and flow.

Versatile, Space-Saving Design

With a small footprint of only 23 inches of linear bench space and a mid-size bed capacity, you'll have the perfect blend of size, performance, and capacity. On-bed reservoirs provide access for up to four solvents without utilizing a position on the bed. The modular design supports the use of Code 20-, 200-, or 34X-series racks and easily accommodates a variety of tubes, vials, and microplates.

LOADING SYSTEMS

Gilson provides loading systems, allowing for sample transfers and other liquid handling tasks. These reliable systems can fit in any automated liquid handling platform or in HPLC semi-preparative and preparative systems.

SELECTION GUIDE

VERITY® Syringe Pumps Provide Speed and Reliability

- Performs small- and large-volume, repetitive liquid transfers
- Available in single, dual, and dual syringe with tee configurations
- Compatible with all Gilson liquid handlers

Learn more

GX SOLVENT SYSTEM

Bi-Directional Pump for the GX-271 and GX-281 Liquid Handlers

The GX Solvent System can switch from aspirate to dispense mode and can deliver liquids at flow rates up to 50 mL/min.

It can accommodate up to five different reservoir solvents.

Learn more

---

verity® 4120

The VERITY® 4120 Dual with Tee Syringe Pump is equipped with two syringes that are user-selectable. The capacity of the left syringe must be greater than or equal to the right syringe. The instrument includes one valve to direct liquid from reservoir or probe (on the left) and a tee connected via junction tubing (on the right). Single syringe and standard dual (no tee) models are also available.

The VERITY 4120 Dual with Tee Syringe Pump assures accuracy in sample transfers, dilutions, reagent additions, mixing, and other liquid handling tasks. It offers speed and reliability for liquid handling tasks.

VERITY® 4120 Dual with Tee Syringe Pump

Technical Specification	Definition
Communication	USB
Dimensions (W x D x H)	22.6 x 17.1 x 26.9 cm (8.9 x 6.7 x 10.6 in.)
Precision	1%
Syringe Capacity	100 µL, 250 µL, 500 µL, 1 mL, 5 mL, 10 mL, or 25 mL
Software Control	PC control via USB and TRILUTION® LH or TRILUTION® LC Software
Tee	**Type:** Three port, no moving parts **Diameter of channels**: 1.5 mm **Length of channels:** 14 mm **Angle between channels:** 120° **Liquid contact material:** PEEK **Dead volume:** 51 µL
Volumetric Accuracy	±2% (10%–90% syringe capacity, water)
Weight	6.8 kg (15.0 lbs.)

RACKS

STANDARD AND CUSTOM RACKS

Gilson offers standard and custom racks to meet the needs of any application. A variety of vessels can be accommodated, including tubes, vials, microplates, and microchips.

RACKCOUNT™ SYSTEM

RackCount System overlays add numbering patterns to rack positions allowing you to quickly and easily locate specific samples or collected fractions on the bed of Gilson liquid handlers. The overlays are available in serpentine or non-serpentine numbering patterns.
ACCESSORIES

OPTIMIZE YOUR INSTRUMENTATION

Complementing durable and flexible instruments, Gilson accessories optimize instrumentation to fit application requirements for the ultimate solution.

SELECTION GUIDE

VALVEMATE® II Valve Actuator

Increase the Flexibility of Your System

Extends the capability of any chromatography or liquid handling system by offering options for solvent selection, column switching, and sample trapping

Wide variety of valves, available in stainless steel or in biocompatible materials

Fully controlled either via keypad or by TRILUTION® LC and LH Software

Learn more

Orbital Shaker

The Orbital Shaker is specifically designed for on-line or off-line liquid handling, vortexing, and mixing. It is a fully functional, stand-alone instrument. This compact shaker fits on one rack position of a GX-281 Liquid Handler bed. The shaker provides a range of customer-controlled shaking (20 to 720 rpm), allowing vortexing on various vessel sizes and sample volumes.

Compatible with a Wide Range of Racks

The Orbital Shaker is compatible with all Code 200-series racks. A single rack attaches easily using set screws; rack placement is accurately guided by locator pins.

Learn more

Racks

Gilson offers standard and custom SPE racks to meet the needs of any and all applications. A variety of vessels can be accommodated including tubes, vials, or microplates.

PURIFICATION

Scaling up Your Systems, From Research to Production

INSTRUMENTS
From high performance liquid chromatography to centrifugal partition chromatography, we offer manual and automated solutions, available through purchase or leasing.
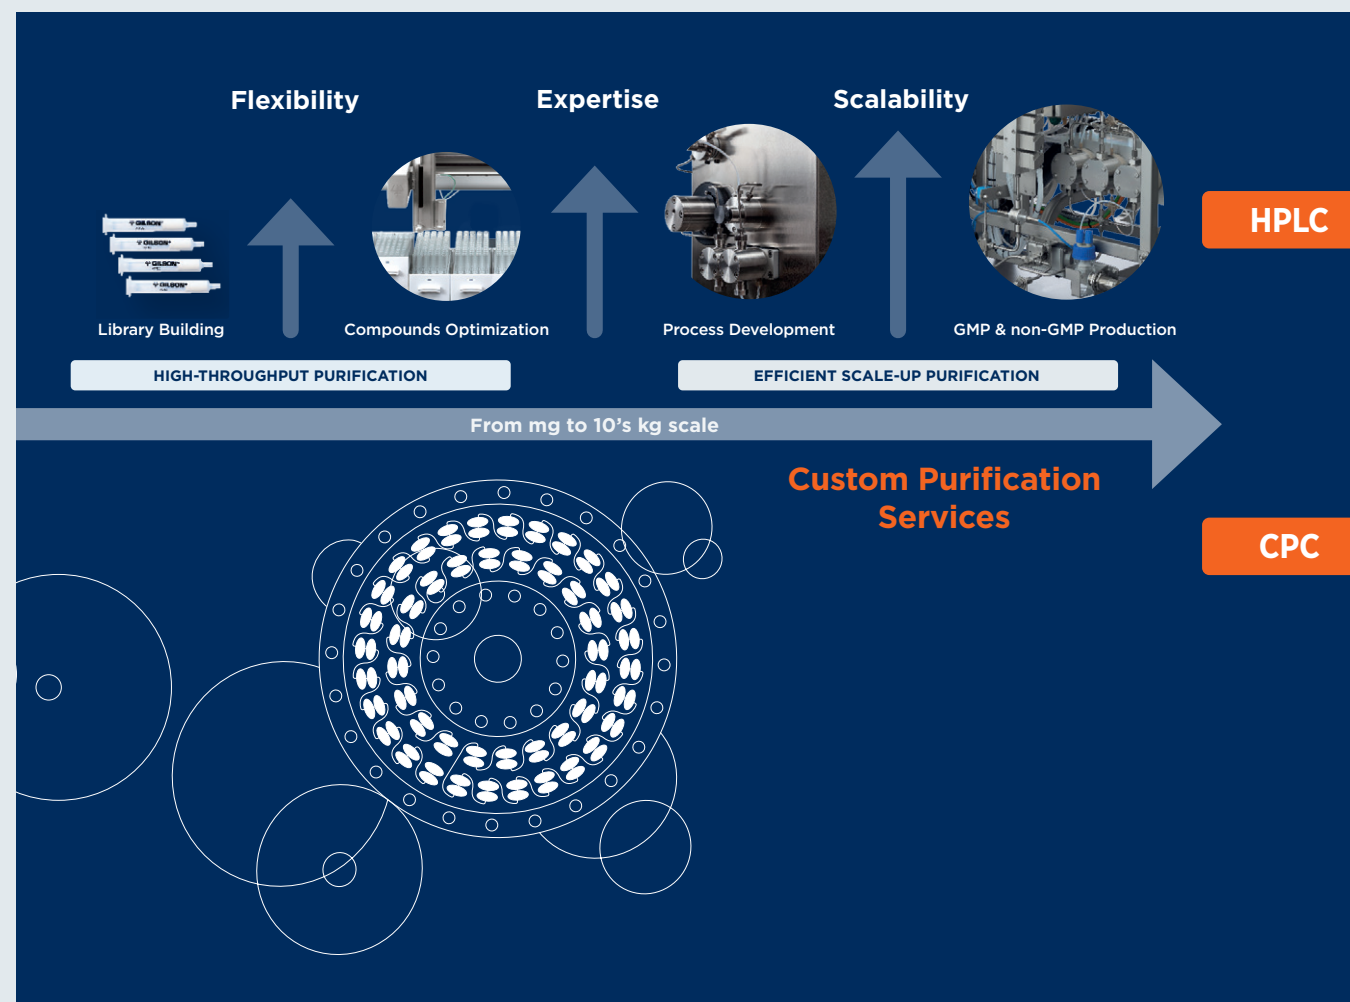

EXPERTISE
From feasibility studies to method development, we secure your investment by providing expert advice, either from our application labs or in your lab.

SERVICES
From standard maintenance, qualification, and service, we guarantee the performance of your equipment. To support your rapid development, we can purify your compounds in our kilogram scale lab.

Always a Gilson Solution to Reach Your Requirements

Flexibility   Expertise   Scalability

Library Building   Compounds Optimization   Process Development   GMP & non-GMP Production

HIGH-THROUGHPUT PURIFICATION   **EFFICIENT SCALE-UP PURIFICATION**

From mg to 10's kg scale

Custom Purification Services

HPLC

CPC

"
Achieve accurate, reliable results with our purification chromatography systems and solutions.

Purify
- Isolate active ingredients or analytical standards with a high degree of purity
- Isolate impurities for further characterization

Fractionate
- Global partition of an extract to identify active compounds from sub-groups
- Partition to remove non-desirable molecule(s) from a complex mixture

Polish
- Increase purity of an already relatively pure compound

Capture
- Enrich a targeted compound from a large volume sample

Desalt
- Removal of salts from previous purification steps

Chromatography Solutions

High Performance Liquid Chromatography (HPLC) or Cartridge Based
Sample constituent are separated based on their relative affinities for the mobile phase and the solid stationary phase.

GILSON — To learn more about our Liquid Chromatography HPLC solutions, visit www.gilson.com.

Learn more

Centrifugal Partition Chromatography (CPC)
The components are separated based on their partition coefficient between two immiscible liquid phases: the stationary and mobile phases.

PUMPS

Gilson offers unsurpassed flexibility in pumping systems with an extensive product range and accommodations.

SELECTION GUIDE

VERITY® 3011 ISOCRATIC PUMP

Ideal Pumping Solution for Chemical Reaction in Petroleum Applications, and GPC Cleanup in Environmental Applications

• High-pressure rating, up to 8,700 psi (600 bar), for accommodating industrial level applications
• Quick-connect pump heads for simple maintenance and reduced downtime
• Flow rates from 10 µL/min to 10 mL/min and integrated touchscreen controller for convenient, stand-alone operation

Learn more

305 HPLC PUMP 306 HPLC PUMP

Cost-Effective, Dependable Pumping Solution

• Available in isocratic, binary, and ternary configurations
• Interchangeable pump heads to accommodate flow rates from 10 µL/min to 200 mL/min at pressure up to 8700 psi (600 bar), depending on the pump head.

Learn more

322 HPLC PUMP

Binary High Pressure Gradient Pump for Analytical to Semi-Preparative HPLC

• Accommodates flow rates from 0.30 mL/min up to 30 mL/min at pressures up to 4,350 psi (300 bar)
• Compatible with HPLC columns from 4.6 to 20mm ID
• Variable High-pressure dynamic mixer

Learn more

VERITY® 3240 PUMP

Premiere High Performance Binary Gradient Pump for semi preparative to Preparative Chromatography

• Large flow rate up to 150ml/min and pressure range up to 420 bar (6090 psi)
• Designed to effectively work with preparative HPLC columns from 10 mm to 50 mm ID
• Ideal for high throughput purification chromatography allowing for scaling up purification from milligrams up to tens of grams

Learn more

333/334 HPLC PUMPS

High Flow Binary Gradient Pump for Preparative HPLC

• Accommodates flow rates up ranging from 1 mL/min to 200 mL/min at pressures up to 3,040 psi (210 bar) using columns up to 50 mm ID
• Features a variable-volume, dynamic mixer for optimized high pressure gradient performance

3011

MAKE YOUR LAB LIFE EASIER

The VERITY® 3011 Isocratic Pump is an innovative liquid delivery solution for chemical reaction monitoring in petroleum applications and for gel permeation chromatography (GPC Cleanup) in environmental and food, and beverage testing applications.

Simple Head Changing

The VERITY 3011 Isocratic Pump features a virtually pulse-free, stable solvent flow rate, ensuring stable flow delivery to detectors, and allowing for a wider range of application capabilities on one pump. The pump also features an easily interchangeable quick-connect pump head, making maintenance simple and reducing costly downtime.

The reproducibility and accuracy in reactions when using this pump, coupled with its low operation and maintenance costs, makes the VERITY 3011 Pump an ideal choice for many laboratories that pursue improved results and are trying to minimize costs, operators, and downtime.

The VERITY 3011 Isocratic Pump offers a stand-alone pumping system with high valued features:

● Quick-connect pump heads for easy installation, and simple maintenance
● High pressure rating for accommodating industrial level applications in the petroleum industry
● Integrated touchscreen controller for convenient, stand-alone operation
● Compact and stackable design that fits easily into a refrigeration unit or a fume hood
● Flow rates from 0.01 to 10 mL/min, depending on the pump head, and pressures of up to 600 bar (8702 psi)

verity® 3240

The VERITY® 3240 High Pressure Binary Gradient Pump is designed for semi-preparative to preparative purification. It provides an economical and compact pumping solution for preparative purification.

Purify With Confidence

The VERITY 3240 Pump delivers reproducible and precise elution gradients to achieve repetitive isolations of targeted compounds with Gilson high throughput purification platforms.

Scale Up Capabilities

The VERITY 3240 Pump has been designed to effectively work with preparative HPLC columns from 10 mm to 50 mm ID allowing for scaling up purification from milligrams up to tens of grams on the same Gilson automated purification platform.

Workhorse in the Laboratory

The large flow rate up to 150 mL/min and pressure range up to 420 bar (6090 psi) allow the VERITY 3240 Pump to cover most semi-preparative to preparative HPLC purification needs.

Safe and Efficient

The VERITY 3240 Pump has an optional leak detector to secure purifications. Optional inlet solvent selectors for up to four solvents per head support high throughput purification on different column types or for column regeneration.

DETECTORS

Gilson offers a complete line of HPLC detection solutions that are ideal for analytical, semi-preparative, and preparative HPLC applications.

SELECTION GUIDE

VERITY® 1741 UV-VIS Detector

UV-VIS Diode Array Detection

- With a large selection of flow cells for semi-preparative to preparative purification (up to 500mL/min), the reliable and versatile VERITY® 1741 UV-VIS Detector is coupled with the power of multiple-wavelength scanning range from 200nm to 800nm.

Learn more

VERITY® 1920 Mass Spectrometer

Mass Detection

- High detection sensitivity and selectivity for compounds purification thus improving time to discovery.
- With a mass range of 10-2000 m/z, the VERITY 1920 MS helps you detect small to large molecules such as peptides and small proteins easily.
- Available with either electrospray ionization (ESI) or atmospheric pressure chemical ionization (APCI) ion source.

Learn more

VERITY® 1601 ELS DETECTOR

ELS Detection

- Evaporative Light-Scattering Detection is a nearly-universal and powerful detection mode for liquid chromatography.
- Commonly used as a complementary option to UV-Vis detection when analytes do not possess any chromophore.
- The VERITY® 1601 features a specific nebulizer, for the needs of preparative HPLC and Flash Chromatography.
- Low-temperature evaporation leveraging semi-volatile or thermally labile compounds detectability.

Learn more

VERITY® 1810 Conductivity and pH Monitor
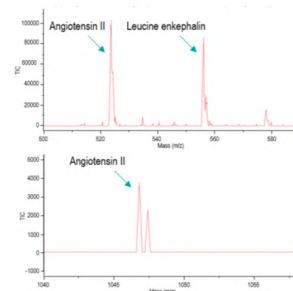

Conductivity and pH Detection

- The VERITY® 1810 is an integrated conductivity sensor and an external optional pH sensor, ideal for pH dependent purifications.

PEPTIDE AND OLIGONUCLEOTIDE PURIFICATION SYSTEMS

SELECTION GUIDE

PEPTIDE PURIFICATION

Mass-Based Peptide Purification

The VERITY 271 LCMS system combines the power of High-Performance Liquid Chromatography (HPLC) with Mass Detection (MS) for conditional fraction collection.

Initial screening for peptide purification can be done using smaller columns for scouting, and then the LC optimized conditions can be scaled up, allowing researchers to target a specific peptide for purification. In addition, with UV-VIS detection, the optional single quad VERITY. 1920 MS Detector with electrospray ionization (ESI) or atmospheric pressure chemical ionization (APCI) ion sources supports targeted fractions collection using selected ion monitoring (SIM) channels.

With a mass range of 10-2000 m/z, the VERITY 1920 MS helps you easily detect large molecules such as peptides and small proteins. Many biomolecules carry multiple charges with electrospray ionization so that even proteins of several tens of kDa can be measured within the 2,000 m/z range.

The method takes advantage of the software's powerful conditional fraction collection feature, which simultaneously combines UV-VIS signals and up to five MS channels to improve selectivity and purity.

Learn more

Parallel Cartridge-Based Purification Desalting for Proteomics

The peptides can be desalted after cell lysis and protein digestion using a 4-probe positive pressure Gilson ASPEC® 274 System, typically with C18 1 mL solid phase extraction columns prior to LCMS/MS analysis.

Small Length Oligonucleotide Purification

The small length oligonucleotides can be purified on cartridges. The parallel purification allows for higher throughput.

Learn more

Tools and Resources

Application Notes: GX-271 Oligo Purification System: Streamlined Purification of Assay-Ready Oligonucleotides by Automated HPLC

FLEXIBLE AND HIGH THROUGHPUT PURIFICATION OF OLIGONUCLEOTIDES

After the cleavage and deprotection steps, the purification of oligonucleotides is done by Ion pairing reversed phase (IP-RP) or ion exchange (IEX) liquid chromatography. After purification, the fractions are desalted by Size Exclusion Chromatography (SEC – Gel Filtration).

This ideal purification system is able to deliver consistent and precise gradients to allow impurity removal while achieving a high-level recovery at various scales.

Purification

Buffer Exchange – Desalting
Analysis

OLIGONUCLEOTIDE PURIFICATION

**Purify and Control Oligonucleotides in One Continuous Production Run**

with the VERITY® Oligo Purification System, you can now have a single platform for continuous purification and analysis of reagent-grade oligonucleotides then desalting of the controlled fractions

A Single System to Save Space and Money

The VERITY Oligo Purification System can be configured to your needs and budget from a secure and robust purification platform up to a continuous production of oligonucleotides that can be operated 24 hours a day, 6 or 7 days a week.

TRILUTION® LC Software

TRILUTION LC Software is a user-friendly software for controlling our high-pressure liquid chromatography systems and automated liquid handling instruments. TRILUTION LC provides fraction collection capabilities, conditional logic collection, , accurate fraction simulation, graphical drag-and-drop user interface, and graphical sample tracking. Built-in, software-based error handling conditions for each process stage can be customized for fully automated, unattended operation without fear of sample loss.
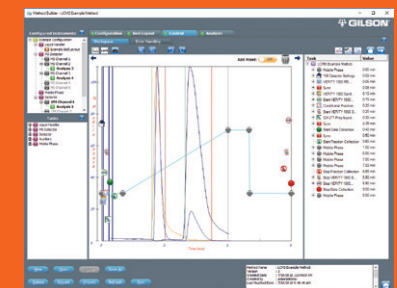

🛒 **REQUEST A QUOTE**   Visit www.gilson.com

LC PURIFICATION SYSTEMS

With the capability to purify compounds by preparative HPLC, flash chromatography, and CPC on the same instrument, Gilson's PLC 2050/2250/2500 Purification Systems simplify and streamline compound purification. These compact systems feature UV-VIS detection, an integrated pumping system, fraction collector, touchscreen control, and Gilson GLIDER Software.

These customizable instruments are available in simple configurations for basic applications, but with a wide range of upgrade options to meet your lab's demands. PLC 2050 and PLC 2250 Purification Systems with Autosampler are configured with a GX-241 Liquid Handler for automated sample injections and increased throughput.

High Performance Features

- Intuitive touchscreen interface for easy method writing and modifying of parameters
- Built-in automatic injection valve
- Two or four independent solvent inlets for binary or quaternary gradients
- Three-rack fraction collector capacity with unlimited collection cycles
- Variable dynamic mixing chamber
- Dual reciprocating pump technology
- Four-wavelength UV-VIS or DAD detector
- Evaporative light scattering detection (ELSD Option)

GLIDER Software
GLIDER Software supports the PLC Purification Systems, creating a single, advanced tool for HPLC, flash chromatography, and CPC applications.

PLC Purification Systems for Each Column Size

PLC 2050: Flow rates up to 50 mL/min with pressure up to 300 bar
- Prep HPLC: 10–30 mm diameter ID columns
- CPC: 100 mL column
- Flash Chromatography: 2.5–70 g cartridges

PLC 2250: Flow rates up to 250 mL/min with pressure up to 230 bar
- Prep HPLC: 10–70 mm diameter ID columns
- CPC: 250 mL column
- Flash Chromatography: 10–600 g cartridges

PLC 2500: Flow rates up to 500 mL/min with pressure up to 110 bar
- Prep HPLC: 20–75mm diameter ID columns
- CPC: 1000 mL column
- Flash Chromatography: up to 1.2 kg cartridges

PLC Purification Systems are compatible with CPC columns.

CPC LAB MS

The VERITY® CPC Lab MS System allows you to perform mass directed purification of target compounds by centrifugal partition chromatography (CPC). This automated, cost-effective, liquid-liquid purification technique utilizes reusable, silica-free chromatographic columns, and the VERITY® 1920 Mass Spectrometer to streamline your workflow and allow you to quickly isolate added value molecules with high yields and purity.

Efficient and Streamlined Workflow
The reusable, silica-free columns offer high injection capacities of milligrams to kilograms. There are no columns to replace or silica to recycle, and no risk of blocked or contaminated columns. The VERITY CPC Lab MS System uses five times less solvent and eliminates the need for pre-treatment prior to injection.

Save Time with Mass-directed Purification
Mass-directed purification saves time by targeting compounds of interest, reducing the overall number of fractions collected that require dry down, reconstitution, and analysis.

Ideal for Isolation of Biologically Active Natural Products
Natural products are usually complex and can contain multiple valuable molecules. Mass-directed purification allows individual targeting and selective collection of molecules, even for those that do not provide UV signal, based on their mass to charge ratio.

Because the VERITY CPC Lab MS System does not denature fragile molecules, it is an ideal choice for natural extract fractionation and natural compound purification. Achieve 95% recovery with > 99% purity.

Easy-to-Use
This fully automated system is controlled by GLIDER Software, praised by users for its intuitive touchscreen interface that enables easy method writing and modification of parameters.

SKID LC

The VERITY® SKID LC is designed for use in preparative and industrial liquid chromatography (LC). The system automatically elutes the mobile phase, injects a solution, detects molecules by UV/VIS absorbance (by default 200 to 600 nm), and collects fractions when connected to a LC column, such as HPLC, MPLC, or CPC. Several of the features detailed below can be customized for your needs.

Reliable and Powerful

- Operates at a maximum pressure of 100 bar (1450 psi)
- Up to 5 L/mn fast elution pump available in isocratic (1 pump) or binary (2 pumps) versions
- Elution piston pump achieves 2% flowrate accuracy and 0.5% flowrate repeatability for faster cleaning and optimized production time, along with improved reliability for production, cost-planning, and quality
- Pressure transmitters, alarms, and leak sensors make for improved performance and control of the fluidic journey

Easy-to-Use and Flexible

- Structure is solvent-resistant and compatible with a broader range of applications
- Reinforced rotative wheels equipped with directional locks and brakes for easy mobility on-site
- Easy-to-use software allowing automated stack injections and a preset list of methods for automated production
- Backflush valves for ascending and descending modes, which allow for safer and easier use with dual rinsing and dual modes

Safe and Compliant

- Controlled by a certified 21 CFR part 11 chromatographic software specifically designed for production
- Software allows for automatic recording of process data that can be shared via customer's network, and customizable reports and alerts for full control of actions performed during processing
- CE and ATEX certified for use in a potentially explosive atmosphere and equipped with FDA compliant spare parts and consumables

PURIFICATION SERVICES

ENRICH OR PURIFY ACTIVE INGREDIENTS FROM MG TO TONS

Gilson Purification has over 40 years experience in analytical, preparative and industrial scale chromatography. We provide specialist purification services, helping you purify or enrich your molecules of interest. Whether you have simple or complex starting materials, such as biological matrices, natural extracts, synthetic mixtures, or fermentations broths, we offer end-to-end support from feasibility to production through industrial intensification.

Contact US

Your Needs Are Our Goals

- Production of highly purified analytical standards
- Production of active ingredients
- Removal of non-desirable molecule(s) from a complex mixture
- Global fractionation of your extract
- Target molecule enrichment
- Impurity isolation
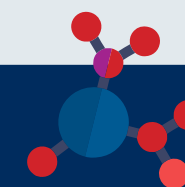

How We Can Support You

- Feasibility study, method development and optimization
- Intensification, scale up study, CAPEX, OPEX evaluation
- In-house production from mg to tons scale
- Full project support to provide turnkey solutions including instrumentations & method(s)

Our Team, Equipment, and Technologies

- A complete team of chemical engineers, scientists, and technicians
- R&D and Pilot/Production application laboratories
- Innovative silica free Centrifugal Partition Chromatography technology for complex mixture purification
- Prep and process LC techniques such as flash chromatography and HPLC
- Analytical equipment for purity determination or structural elucidation (e.g. HPLC, HPTLC, GC, NMR, etc.)

Service Model Options

- Service performed at our state-of-the-art facility at Gilson Purification
- Outsourcing solution by our team of experts in your facility
- Consultation service

Thanks to our team of experts and our in-house innovative purification technology, we can solve problems related to the use of traditional techniques and make chromatography an affordable technology for a larger range of applications.

Specification of your project under NDA > **Feasibility studies / Scale up / Production** > **Report and wrap up meeting**

Gilson purification services is not available globally. Please contact your local Gilson representative for more information.

EXTRACTION

GET THE MOST FROM YOUR ANALYTICAL SYSTEMS WITH TRUSTED RESULTS

Solid phase extraction (SPE) is a highly selective clean-up technique that eliminates matrix effects and concentrates compounds present as traces to improve analytical detection. The ASPEC® extraction line offers hands-free solutions that provides increased sample throughput and reliable test results while providing the traceability needed when studying drugs metabolites, contaminants, or proteins in biological, food, or environmental matrices.

SELECTION GUIDE

ASPEC® 241 System

- Compact system for basic SPE automation
- Up to 36 samples on 1 mL cartridges, 20 on 3 mL, and 16 on 6 mL

[Learn more]

ASPEC® 271 System

- Ultimate versatility system for basic and advanced SPE automation
- Up to 108 samples on 1 mL cartridges, 60 on 3 mL, and 48 on 6 mL
- Optional dual syringe for accurate transfer down to 10 µL
- Optional injection for direct UHPLC or LC integration
- Compatible with Gel Permation Chromatography (GPC) and liquid-liquid extraction (LLE) and SLE cleanup applications

[Learn more]

ASPEC® 274 System

- High throughput system for basic and advanced SPE automation
- Process four samples in parallel
- Up to 108 samples on 1 mL cartridges, 60 on 3 mL and 48 on 6 mL
- Compatible with LLE and SLE cleanup

[Learn more]

ASPEC® 271 Large Volume System

- Ultimate versatility system for basic and advanced small- to large-volume SPE automation
- Up to 9 large volume samples on 3 mL and 6 mL cartridges
- Segregated aqueous and organic waste
- Optional dual syringe for accurate transfer down to 10 µL
- Optional injection for direct UPLC or LC integration
- Compatible with GPC and LLE cleanup applications

[Learn more]

ASPEC® 274 Large Volume System

- High throughput system for small- to large-volume SPE automation
- Process four samples in parallel
- Up to 32 samples on 3 mL and 6 mL cartridges
- Segregated aqueous and organic waste
- Compatible with LLE cleanup

PPM

IMPROVE MANUAL SPE REPRODUCIBILITY

With a uniform and consistent flow rate, the ASPEC® Positive Pressure Manifold (PPM) improves solid phase extraction (SPE) reproducibility and recovery, even with high viscosity samples. It integrates easily into your lab's workflow and provides a fast and simple way to prepare samples for subsequent analysis by chromatography.

Compact and Easy to Set Up for Quick Operation

With its small footprint and only a single gas input, the ASPEC PPM is quick to set up and easily fits under fume hoods for extractions that use volatile solvents.

Positive Pressure for Reproducible Extractions

With its integrated pressure gauge and intuitive controller, the manifold provides better flow control among samples and between runs than traditional vacuum manifolds, providing greater confidence in your data. Positive pressure ensures that all samples will elute regardless of the viscosity level.

Parallel Clean Up

Compatible with both popular SPE cartridges and 96-well plates, the ASPEC PPM performs parallel extractions to increase throughput and productivity.

Optimize Workflow Throughput

By combining the ASPEC PPM with PIPETMAN® multichannel pipettes or PLATEMASTER® for 96-well SPE plates, get the guarantee of accurate and fast sample management and extraction.

One Unit - Four Formats

The base module is compatible with ASPEC SPE cartridges (1, 3, and 6 mL) and 96-well SPE plates for a high throughput clean-up.

Tools and Resources

Application Notes: LCMS/MS detection of Δ⁹−tetrahydrocannabinol in plasma using solid phase extraction cleanup

aspec®

274

The ASPEC® 274 System for positive pressure solid phase extraction (SPE) maximizes throughput by processing up to four samples in parallel. With its small footprint and multiple probes, it is the ideal choice for high-throughput SPE automation on 1, 3, or 6 mL cartridges. Combined with ASPEC® SPE Cartridges, it generates reproducible and efficient sample cleanup for clinical, forensic, doping, food, and environmental testing labs.

Parallel Processing for Maximum Efficiency

Four-probe Z-arm enables processing of four samples in parallel, increasing throughput and efficiency.

Positive Pressure for Reproducible Extractions

Positive pressure extraction with a unique sealing cap design increases reproducibility from sample to sample. The syringe pump delivers accurate volume dispensing with reproducible flow-rate.

Smart Design for Maximized Performance

Mobile rack technology enables multiple fractions elution and extractions per sample and additional fractions transfer in closed vials after SPE.

Intuitive Error Handling for Trusted Results

The syringe pump pressure-sensing module provides error handling for high cartridge pressure or clogged liquid lines and monitors pressure on each fluid path individually. Innovative jet wash rinse stations minimize carryover and cross contamination.

Versatile Software Control for Optimized Productivity

TRILUTION® LH Software allows for multiple liquid handling applications such as liquid-liquid extraction (LLE) and SPE on the same ASPEC system. Optimize throughput and efficiency by processing samples in either batch or sequential mode. Perform multiple elution and parallel solvent testing to quickly automate and optimize method development.

TRILUTION® LH Software

TRILUTION® LH Software is a comprehensive software package for seamless automation of all liquid handling (LH) and solid phase extraction (SPE) methods.
With its intuitive interface, simple drag-and-drop method creation, and application simulation, it combines flexibility and ease-of-use.

SPE CARTRIDGES

CONSISTENT PERFORMANCE, RELIABLE RESULTS

Get more reliable results with ASPEC® SPE Cartridges, ready-to-use, high-quality silica, and polymer cartridges. The ASPEC SPE Cartridges are available with ASPEC caps for cost-effective, automation-ready use on ASPEC automated solutions.

Key Features of Pre-Capped Cartridges for ASPEC Automation

- Run cartridges right out of the box, saving valuable time with no need for manual capping
- Remove potential health concerns with repetitive manual operations
- Run samples faster
- Prevent run stopping due to improperly installed caps
- Competitively priced versus uncapped cartridges with separated caps

Highly Selective Solutions

High performance solid phase extraction sorbents based on specific polymers or molecularly imprinted polymers (MIP) for sample cleanup before chromatographic analytical methods. AFFINIMIP® SPE and AttractSPE™ are now available pre-capped for ASPEC automation.

- **Mycotoxins**
  Aflatoxins, Ochratoxin A, Patulin, ZON, DON

ASPEC SPE Cartridges - Retention Mechanisms Selection

Sample properties, such as matrix type and compounds of interest solubility and polarity, give a good starting point to identify the recommended sorbent and retention mechanism:

Analyte is soluble in	Sample Matrix Type		Analyte polarity	Recommended Phases (SILICA BASED - POLYMERIC)
Aqueous		Aqueous	Non polar	ASPEC C18, ASPEC C8, ASPEC C4, ASPEC PHENYL, ASPEC CYCLOHEXYL, **ASPEC DVB**
			Non polar/ Moderately polar	ASPEC C18 NEC, ASPEC C8, ASPEC C4, ASPEC CYANO, **ASPEC HLB**
			Polar	ASPEC CYANO, ASPEC ACT. CARBON
		Aqueous/Organic	Cationic/Basic	ASPEC SCX, ASPEC SCX-2, ASPEC WCX
			Cationic/Basic (Neutral)	**ASPEC X-SCX**, **ASPEC X-WCX**
			Anionic/Acid	ASPEC SAX, ASPEC SAX-2, ASPEC WAX, ASPEC WAX-2
			Anionic/Acid (Neutral)	**ASPEC X-SAX**, **ASPEC X-WAX**
		Organic	Non polar	ASPEC C18, ASPEC C8, ASPEC C4, ASPEC PHENYL, ASPEC CYCLOHEXYL, **ASPEC DVB**, **ASPEC HLB**
Organic		Aqueous	Non polar	ASPEC C18, ASPEC C8, ASPEC C4, ASPEC PHENYL, ASPEC CYCLOHEXYL, **ASPEC DVB**, **ASPEC HLB**
			Cationic/Basic	ASPEC SCX, ASPEC SCX-2, ASPEC WCX
			Cationic/Basic (Neutral)	**ASPEC X-SCX**, **ASPEC X-WCX**
			Anionic/Acid	ASPEC SAX, ASPEC SAX-2, ASPEC WAX, ASPEC WAX-2
			Anionic/Acid (Neutral)	**ASPEC X-SAX**, **ASPEC X-WAX**
		Organic	Moderately polar	ASPEC SILICA, ASPEC FLORISIL, ASPEC ALUMINA, ASPEC CYANO, ASPEC DIOL NEC
			Polar	ASPEC CYANO, ASPEC DIOL NEC
verity®

GPC Cleanup is a simple but efficient clean-up technique to eliminate matrix effect and preserve your GC or LC column life by discarding high molecular weight interfering substances contained in sample extracts and recovering analytes of interest into a pure fraction of solvent. The VERITY® GPC Cleanup system is a fully automated cleanup system which makes it an ideal tool to minimize risks to the users and improve reproducibility.

Fully Automated System to Improve Efficiency and Reliability

GPC post-extraction cleanup is typically used prior to analysis of contaminants such as pesticides, semi-volatiles, PAHs and PCBs, and pharmaceuticals - in environmental samples, food products, and animal tissue

High Capacity

- Automated cleanup of up to 80 sample extracts

Complete Workflow Integration

- Large choice of racks for sample extracts and different evaporation vessels to directly collect compounds inside

Compliance with Government Agency Guidelines and Methods

- Meets government requirements for GPC cleanup – USEPA, USDA, USFDA, USGS, USDI, Centers for Disease Control (CDC), Canadian Food Inspection Agency (CFIA), European Union (EN 1528, 12393, DFG S19), AOAC International, etc.
- An optional VERITY® 1741 UV-Vis Detector (200-800 nm) is available to ensure GPC column calibration in compliance with GPC post-extraction guidelines when requested
The VERITY® GPC Cleanup System is configured with a GX-271 Liquid Handler equipped with 3- ways collection valve, GX Direct Injection Module, VERITY® 4020 Single Syringe Pump, VERITY® 3011 Isocratic Pump, TRILUTION® LC Software, and an optional 1741 UV-VIS Detector

High Flexibility

- Compatible with various columns from low pressure glass columns to higher pressure Stainless steel columns with the VERITY® 3011 Isocratic Pump (up to 10 mL/min, 600 bar (8702 psi))
- Can also be used for other chromatography applications as an Isocratic HPLC system from analytical to semi-preparative scale

Sample Integrity

- The septum piercing capability option can maintain the integrity of a sample extract by using closed tubes
- Overfill of the sample loop is not required, which helps to conserve the sample
- Independent flow paths between injection and fraction collection avoids cross contamination

All Under TRILUTION® LC Software Control : Easy-to-Use for a Full Safe Control

The VERITY GPC System is controlled by the powerful TRILUTION LC software which contains pre-programmed methods for GPC post-extraction cleanup. The software error handling and shutdown methods help to minimize solvent waste and sample loss.

extractman®

EXTRACTMAN® offers a fast and gentle paramagnetic beads-based approach to isolating target proteins and is ideal for isolating elusive, weakly-bound protein complexes critical to protein interaction research.

Identifying Weak Proteins Interactions

Co-immunoprecipitation (Co-IP) is a common technique for observing protein-protein interactions; however, weakly-or transiently-bound species often go undetected as aggressive or repeated wash steps can result in a loss of these interactions.

EXTRACTMAN differs from traditional magnetic bead-based co-IP techniques by using Exclusion-based Sample Preparation (ESP™) technology, making it ideal for capturing weakly bound protein complexes without exposing them to high shear forces from.

Paired with non-porous magnetic beads, EXTRACTMAN enables high-yield, high-purity isolations without the need for long washing steps

Rapid Isolation

EXTRACTMAN® uses surface tension and hydrophobic properties for ESP™-based extraction. This process gently and rapidly pulls bead-analyte complexes from sample to a series of washes and elute enriched and purified target compounds excluding unbound contaminants in a matter of seconds.

### Ergonomic and Easy-to-Use

Slide-based extraction gently moves four samples in parallel through isolation with a simple slide of the handle. EXTRACTMAN has been used to rapidly isolate mRNA, DNA, and proteins from crude extracts using an assortment of commercial kits and reagent.

Gilson SupaTop™

SYRINGE FILTERS

CLARIFY YOUR SAMPLES AND EXTEND THE LIFE OF YOUR ANALYTICAL SYSTEMS

For sample volumes up to 100 mL, the range of Gilson SupaTop™ Syringe Filters provides a quick, convenient, and reliable method of clarifying liquids intended for further analysis such as HPLC injection to combat particulate clogging of columns.

Gilson SupaTop Syringe Filters are available in two sizes, 13 or 25 mm, each with a choice of porosity of 0.22 μm or 0.45 μm.

Maintain Sample Integrity
- Pigment-free and sealant-free polypropylene housing
- HPLC-certified filters with low levels of UV-absorbing extractables

Save Time and Avoid Error
- Color-coded syringe filters to quickly identify membrane and porosity used
- High burst strength and durable construction.

A Membrane for all Your Needs
- The filter membrane should not interfere with the sample or bind proteins or other macromolecules.
- The table below provides a good starting point to identify the type of membrane used by application.

MEMBRANE APPLICATIONS

Application	Membrane Type
(U)HPLC solvents	PTFE or Nylon
Aqueous solution	All except PTFE
Iconic chromatography	PES or PTFE
Protein analysis	PES or PVDF
Environmental and food analysis	PTFE or Nylon
Clinical or toxicological analysis	PES
ICP/AAS metals analysis	PES or Nylon
Cell or Tissue culture media	PES

🛒 **REQUEST A QUOTE**   Visit **www.gilson.com**

Membrane	Properties	Color Code	Pore Size	13 mm Diameter		25 mm Diameter	
				Part No.	Pack of	Part No.	Pack of
PES	Polyethersulfone (PES) is widely used for the clarification of biological samples. This low binding membrane is able to resist surfactants and hydrocarbon oils but is not suitable for use with low-polar organic solvents or aromatic hydrocarbons.		0.2 μm	ANR1322 / ANR1322D	100 / 1000	ANR2522 / ANR2522C	100 / 500
			0.45 μm	ANR1345 / ANR1345D	100 / 1000	ANR2545 / ANR2545C	100 / 500
MCE	Mixed Cellulose Esters (MCE) contain a blend of cellulose acetate and nitrocellulose fibers providing a more resilient membrane than CA for aqueous-based filtration. Higher binding than pure CA.		0.2 μm	ANM1322 / ANM1322D	100 / 1000	ANM2522 / ANM2522C	100 / 500
			0.45 μm	ANM1345 / ANM1345D	100 / 1000	ANM2545 / ANM2545C	100 / 500
NYLON	Polyamide (Nylon) is a popular membrane with superior chemical compatibility than CA or MCE. Able to filter aqueous or mild organic solvents, this membrane is naturally hydrophilic with low extractables.		0.2 μm	ANN1322 / ANN1322D	100 / 1000	ANN2522 / ANN2522C	100 / 500
			0.45 μm	ANN1345 / ANN1345D	100 / 1000	ANN2545 / ANN2545C	100 / 500
PVDF	Polyvinylidene Fluoride (PVDF) exhibits great chemical resilience being non-reactive to many solvents, acids, and bases. Appreciated for its low protein binding properties this membrane is used in biological sciences and its wide chemical compatibility range makes it ideal for HPLC sample preparation ahead of injection.		0.2 μm	ANV1322 / ANV1322D	100 / 1000	ANV2522 / ANV2522C	100 / 500
			0.45 μm	ANV1345 / ANV1345D	100 / 1000	ANV2545 / ANV2545C	100 / 500
PTFE	Polytetrafluoroethylene (PTFE) has the highest chemical compatibility rating of these filters. Being naturally hydrophobic this membrane is most suited to the clarification of organic solvents and for air venting processes. Not suitable for aqueous sample filtration without pre-wetting.		0.2 μm	ANP1322 / ANP1322D	100 / 1000	ANP2522 / ANP2522C	100 / 500
			0.45 μm	ANP1345 / ANP1345D	100 / 1000	ANP2545 / ANP2545C	100 / 500
